

CURIODAO NETWORK TOKEN ECONOMICS

WHAT IS THE CURIODAO NETWORK

CurioDAO is an open-source vehicle, running on Ethereum, SKALE and Polkadot, driven by Curio Governance Token (CGT) holders. CGT holders handle the Creator Protocol and maintain the resilience, transparency, and efficiency of the Curio Stablecoin (CSC). New segments of this Protocol include the Curio Chainlink Oracles, Stablecoin, Voting, and the Creator Security Vaults.

CGT TOKEN

CGT holders can cast votes on actions to be taken on the Creator Protocol. This ensures that decisions related to governance are given consideration, and an agreement is reached before the actual process of voting takes place. The voting process typically helps to confirm (or reject) adjustments to the position of the system. Technically, different kinds of smart contracts handle different kinds of votes. A Proposal contract is a smart contract that is integrated with one or more governance actions but can only be used once. When it is finished, it quickly enacts the changes being voted on into the variables affecting the internal governance of the Protocol. Once used, the Proposal Contract becomes void.

TOKEN DETAILS

Based on Total Supply at Genesis

Standard: ERC-20 Ticker: CGT

- fully backwards compatible to ERC-20
- supports delegation on the token level (Curio Parachain)

*at genesis **Initial Total Supply: 100,000,000 CGT**

Est. Network Burning: 5% per month

on Ethereum and Curio Parachain networks in year 1 – afterwards to be defined by CGT token holders through a vote

*as of 14 January 2022 Total Supply: 51,000,000 CGT

Share CGT on Curio Parachain

*at genesis Initial Total Supply: 14,000,000 CGT

- 10M reserved for the Initial Parachain Offering at Kusama/Polkadot
- 4M CGTs are used to maintain Curio's official validators, early supporters rewards/community airdrops

*at 1 January 2022 Total Supply: 4,000,000 CGT

STAKING ON CURIODAO PARACHAIN

CGT token holders can easily delegate their tokens to Curio Parachain Node validators and earn rewards. Staking adds security to the Curio Parachain network as it results in a security of Curio ecosystem applications on Curio Parachain. nPoS mining rewards are returned to validators and nominators for providing security and compute power to the network

CURIODAO STABLECOIN HYBRID SYSTEM

CurioDAO is building a unique hybrid with Curio Stablecoin Protocol, Ethereum 2.0 staking and Polkadot Curio Parachain

CURIODAO TOKEN OVERVIEW

The Curio Governance token (CGT) is a hybrid use token representing the right to work in the network as a validator, stake as a delegator, or access a share of its resources by deploying and borrowing a stablecoin as a user. Users pay CGT in a membership-based model to access these resources for a predetermined amount of time.

Validators stake CGT on the network, gaining the right to run nodes and earn both fees and tokens via inflation. Nominators may delegate their tokens to validators and earn rewards.

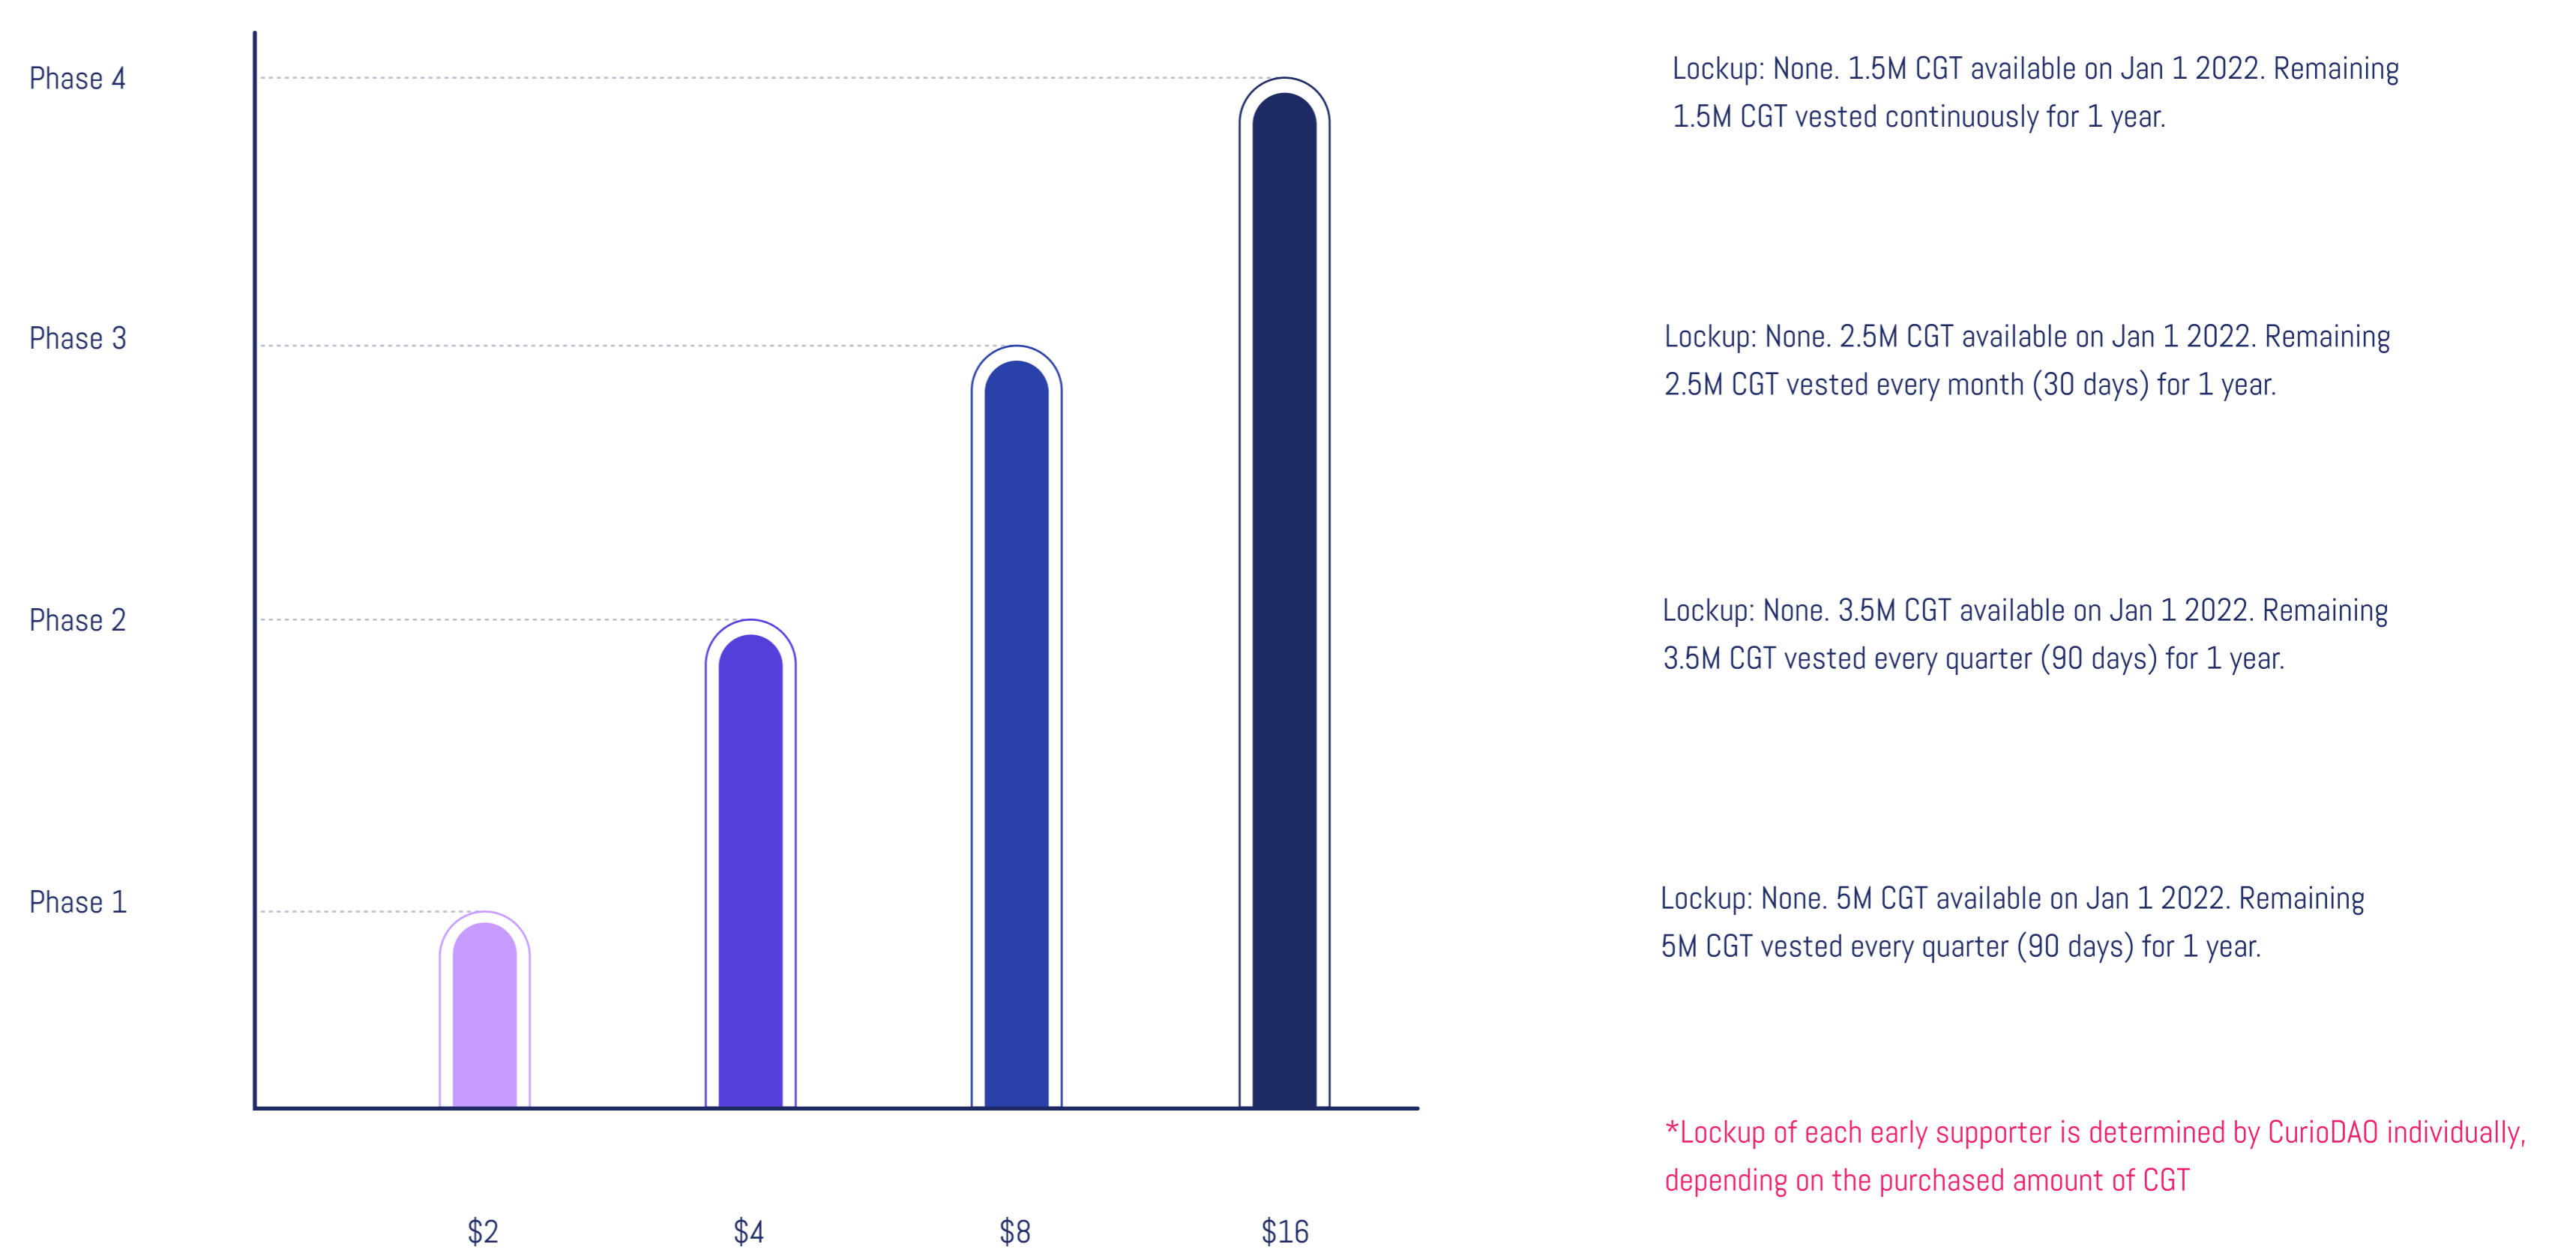

TOKEN DISTRIBUTION

Based on Initial Total Supply at Genesis

TOKEN VESTING SCHEDULE

Tokens awarded to CGT supporters in early (private) rounds are liquid. These tokens can be used in Curio products (Capital DEX / RollApp), as well as in staking on Curio Parachain after the launch of the Ethereum-Curio Parachain bridge.

Early supporters purchased the right to support the Curio ecosystem via an agreement for future tokens

On April 1 2022 CurioDAO will announce the burning of 5M CGT from the early supporters share, which has 12.5M CGT as of January 1 2022.

TOKEN UNLOCK SCHEDULE

Allocation

Vesting Schedule

CurioDAO Ecosystem Pool

Available immediately and used for funding community rewards (farming / liquidity mining / airdrops) and burning events. Amount: 50M CGT *

Early supporters

After January 1, 2022, the Token Vesting Schedule described above will take effect

CurioDAO Core Team Pool

Cliff: until July 1 2021, vesting duration: Jan 1 2021 - July 1 2022 (1.5 years), vesting interval: monthly (30 days), amount: 10M CGT for vesting **

CurioDAO Development Pool

Cliff: no, vesting duration: Jan 1 2021 - Jan 1 2023 (2 years), vesting interval: continuous (0 days), amount: 8M CGT (for vesting), 2M CGT (unfrozen) **

CurioDAO Broader Founding Team

Cliff: until Jan 1 2022, vesting duration: Jan 1 2021 - July 1 2022 (1.5 years), vesting interval: monthly (30 days), amount: 5M CGT for vesting

* As of January 1, 2022, this share was reduced due to community farming events and burning events.

** CurioDAO reserves the right to reduce the share of the Development Pool and Core Team Pool by burning tokens
